

MET Overview

Solutions. Performance. Relationships.

A full service Air Quality Control company since 1934, providing the highest quality of traditional and advanced technologies.

MET – Marsulex Environmental Technologies, headquartered in Lebanon, Pennsylvania, has a long and storied history that dates back to 1934 and the beginning of air quality control systems. Throughout the years, the company has been dedicated to providing traditional and advanced technologies and services that effectively, reliably and efficiently control a wide range of air emissions from industrial and utility systems around the world.

As a full service Air Quality Control company, MET offers technologies to meet the rigid emission requirements of the 21st Century. Our innovative solutions include original equipment and system upgrades in addition to engineering studies for Wet FGD, Dry FGD and Particulate Control technologies.

Our strengths continue to be experienced people, excellence in project execution and solid technologies. We strive to execute every project in a deliberate and focused manner with the philosophy to deliver each project on-schedule, per contract specifications, within budget and in a safe, reliable way.

State-of-the Art Engineering Solutions

MET has provided process design, detailed engineering, procurement, installation and service expertise on hundreds of projects around the world. We execute every project in a solution driven way which enables our clients to meet strict environmental requirements. We are committed to building strong collaborative relationships throughout the industry to properly execute and deliver state-of-the-art OEM and retrofit systems, including:

- *Wet Flue Gas Desulfurization*
- *Dry Flue Gas Desulfurization*
- *Electrostatic Precipitators*
- *Pulse Jet Fabric Filters*
- *Dry Sorbent Injection Technologies*
- *CleanStack[®] for SO₃*

MET services for each technology are performed exclusively by our team of skilled and knowledgeable employees whose tenure with the company or within the industry averages well over 20 years.

Innovative and Flexible Business Approach

MET is a quality provider of environmental solutions with **excellent industry credentials**. We focus on our customers' needs and embrace innovation and technology to meet those needs. We understand that with different projects come different circumstances, which is why we have incorporated a flexible business model portfolio that incorporates:

- *Lump sum, firm pricing*
- *Technology licensing*
- *Cost reimbursable with fixed fee or cost plus*
- *Build, Own, Operate, Maintain (BOOM)*

ISO-9001

Since 1991 the MET business process has been ISO-9001 certified by Lloyd's Register

Quality Assurance. ISO-9001 is the internationally recognized standard to the quality management of business. Our certification is applicable to the development, design and supply of air quality control systems and ensures the customer received the highest measure of quality.

Customer Service

Our dedicated team of professionals place a high level of importance on the service we provide to customers before, during and after each project. Our size and commitment allow us to respond quickly and support clients in a dependable and proficient manner. We offer a wide array of technical support in addition to evaluation, trouble shooting, repair and upgrade services for AQC systems, no matter the OEM. At MET we are committed to your success today, tomorrow and for generations to come.
